

OT vCISO SERVICES

Executive Leadership for Operational Cyber Risk

Industrial organizations do not fail because they lack security tools. They fail because they lack executive ownership of operational cyber risk. Mithryl Systems OT vCISO Services provide strategic leadership that aligns cybersecurity with uptime, safety, operational resilience, and business continuity across converged IT and OT environments.

EXECUTIVE CYBER LEADERSHIP

Provide strategic governance and executive ownership of OT cybersecurity.

OPERATIONAL RISK REDUCTION

Prioritize initiatives that reduce downtime, safety, and operational risk.

BUSINESS ALIGNED GOVERNANCE

Translate cyber risk into business decisions executives can confidently make.

THE CHALLENGE

Executive ownership matters more than additional technology.

Many organizations have security tools but lack unified leadership across IT, OT, engineering, compliance, and executive teams. Without governance, operational cyber risk grows faster than the organization's ability to manage it.

FROM CYBER RISK TO BUSINESS DECISIONS

Executive Leadership. Operational Confidence.

Mithryl Systems OT vCISO Services provide the leadership, strategy, and guidance you need to protect operations and drive long-term resilience.

Build a stronger, more resilient organization.

THE MITHRYL OT vCISO OPERATING MODEL

End-to-end executive leadership for operational cyber resilience.

WHY CUSTOMERS TRUST MITHRYL SYSTEMS

DEEP OT OPERATIONAL EXPERIENCE

We understand legacy systems, safety requirements, maintenance cycles, and production pressure. Guidance is grounded in operational reality.

IT TO OT BRIDGE LEADERSHIP

We align engineering, IT security, and executives under a unified model so risk decisions are coordinated, prioritized, and business driven.

THREAT LED RISK FOCUS

We focus on how attackers actually move across environments and prioritize actions that reduce downtime risk fastest.

EXECUTIVE LEVEL COMMUNICATION

We translate technical exposure into operational, financial, and safety impact so leaders can make informed decisions.

CYBER FUSION INTEGRATION

Our services leverage PhishCloud Cyber Fusion Center strategies for cross-domain visibility, telemetry correlation, and faster decision making.

PRODUCTION FIRST SECURITY MODEL

We strengthen security posture while protecting uptime, safety, and productivity.

HOW OT vCISO WORKS

DELIVERING MEASURABLE BUSINESS VALUE

Executive Leadership. Operational Confidence.

Mithryl Systems OT vCISO Services provide the leadership, strategy, and guidance you need to protect operations and drive long-term resilience.

Drive better outcomes.
Reduce downtime risk.
